

THE EMPRESS EXPRESS

VOLUME XV, No. 16

EMPRESS, ALTA. THURSDAY, Sept. 15, 1927

Price: \$2.00 Per Year

United Church

Church School, 10.30 a.m.
Education is the process of effecting desired changes in the life of the individual. A big purpose confronts us in religious education.

All boys, girls, teachers and others invited and urged to help forward our work for the Fall and Winter. Rally Day will soon be here.

Public Worship, 11.30 a.m.
The outstanding satisfactory elements in our national life can be traced back to Christianity. We help to conserve the good and move on to the best by the support of the church and all the church stands for. Let us meet for worship on Sunday morning. Sermon by the Minister. Everybody welcome.

The music will include a vocal solo.

Rev. N. W. Whitmore, Minister.

Viewfield and Forks

Services next Sunday as follows—

Viewfield, 2.30 p.m.
Forks, 7.00 p.m.
conducted by the Minister. A welcome and an invitation extended to all within reach.
N. W. Whitmore, Min.

Mayfield

United Church Services, September 18:
11 a.m., Divine Service.
12 a.m., Sunday School and Bible Class.
8 p.m., Wainfield School.
All are welcome.
J. M. Johnston, Student Minister.

The movie affords you a pause—a brief vacation—from household worries. It gives life to new thoughts. It gives life to the wife and kiddies to give them the benefit of this entertainment once in a while, even if you deny yourself the pleasure.

A Special Offer

By purchasing any of the following articles you are allowed your choice of any one of them free of charge.
Pike Davis & Co. Tooth Paste, very large tube, 50c. P.D. & Co. Cold Cream, massage and skin cleanser, 50c. Almond Cream, for rough skin, 50c. Shaving Cream, genuine, 40c. Star Shampoo, gives lustre and sheen to the hair, 50c. Skin Protection Cream, 50c. Buy two and save one.

EMPRESS DRUG CO.

Work Progressing On New Lines

Five camps are building the grade on the C.P.R. branch line running north from Rosemary. About 12 miles of grade has already been built, and the work is going ahead at a good rate.

Between Rosemary and the Red Deer River, the line passes over a country that is fairly level, with only gentle undulations, and good progress is being made with the work here.

Grading is finished on the Bow Slope line, and already about 10 miles of steel have been laid.—Mail, Bassano.

Wheat At Vermilion Injured By Frost And Rust

Vermilion, Sept. 14.—Summing up the crop situation in the Vermilion district, it will be found that it will be of a very mediocre kind. And the more threshing that is done the more this is confirmed. Never were prospects brighter, never did wheat stand thicker or firmer and finer, but the frost and black rust took such a heavy toll that many of the wheat crops are 50 to 60 per cent of the promise.

Infantile Paralysis At Edmonton and Calgary

The scare of infantile paralysis in the cities of Edmonton and Calgary is evidently being met with stringent measures by both civic and provincial authorities. In the city of Calgary the schools have been closed for two weeks and should any new cases develop this period will be extended. In Edmonton, should the disease continue to spread to other parts of the province, the authorities may place a ban on families moving from the areas where the disease has broken out. There are five cases reported in Calgary, but no new cases since Monday.

Hospital Notes

Born—To Mr. and Mrs. Joe Knappik, September 9, a daughter.

Mr. Roseum, Estuary, is now in the hospital with an infected hand.

Mrs. Irwin Tucker, jr. and Miss Zolich Tucker, Social Plains, are now in the hospital suffering from influenza.

Mr. Durfee, Blindfold, is in the hospital under medical attention.

Useful Book For Mothers

We have received with the compliments of Chief Helen MacPherson, Div. of Child Welfare, Ottawa, a diamond jubilee edition of "The Canadian Mothers' Book." The work is well illustrated. It is very comprehensive in its treatment of feeding and general care of the baby. Making of clothing suitable for the infant child is also fully dealt with. Modern ideas and new pictures have been added. The book is sent free on application to the Department of Health, Ottawa.

Jimmy Farquharson, ferry inspector, was in town the first of the week.

Here and There

Construction will be started shortly, it is announced, on the 2,400,000 bushel elevator to be erected by the Alberta Wheat Pool at Vancouver, and it is expected that the big plant will be ready to handle grain from the 1927 crop.

Twenty-three members of the Ohio Wesleyan Glee Club sailed recently on the Canadian Pacific steamship Montrose for England, where they will visit a short while before giving a singing tour of the continent, en route to Europe to last about a month.

The Holy Land is to be officially represented at the World's Poultry Congress, it is announced. Dr. David Uri of the poultry experiment station in Palestine, will represent the country at the great international event to be held in London from July 27th to August 4th.

A new direct steamship service between Saint John and Havana, Cuba, will likely be inaugurated from the first of September, when the potato shipments start. If the New Brunswick Government and the shippers of the province back up, the P. & E. Steamships of St. John's, will return from a trip of enquiries in Cuba.

A bed which rocks its occupant to sleep has been invented by Sir Alfred Yarrow, British scientist. While travelling across Canada on the Imperial Limited some months ago, noticed that the slight sway of the train cured his insomnia. This fact resulted in his constructing the unusual bed which enables him to sleep soundly.

A new departure in the province was the recent formation of an association known as the Nova Scotia Chinchilla Rabbit Breeders' Association, at a meeting at Kentville with F. W. Foster of Barrington, president; Mrs. J. B. Darby, vice-president; and G. E. Roberts, of Grand Pré, secretary. The club is open to all breeders of the English Fur Breed.

Search for the missing French aviator, Nungesser and Coli, has been resumed by two False News and two New York Daily News men who arrived at the C.P.R. station in Montreal recently en route to Chicoutimi. Three of the party form a land expedition, while the fourth will fly into the Quebec woods from Grand'More. They will stay in until the mystery of the fiasco is cleared up.

Mr. Macdougall, former Saskatchewan aviator and now a leading stock broker in Los Angeles, has written that if the citizens of Saskatchewan will provide a plane to be entered in the flight from the Pacific coast to Hawaii, which he will fly. He offers Saskatchewan backers half the prize money and half any other receipts, should he be successful. Present resident of the Star has announced that the Star is prepared to make a substantial contribution towards the \$15,000 required. The plane would be named the "City of Saskatchewan."

Unseasonable Weather For Threshing Operations

A heavy rain storm hit this district on Saturday and put a stop to threshing activities and harvesting operations. Drying winds, however, made threshing possible on Monday, Tuesday and Wednesday, unseasonable weather was again with us. A driving wind drove the moisture into the stacks, and threshing appears to be held up for two or three days.

'The Canadian'

Harvesting is in progress on the Ed. Marsh ranch. Winter comes early in the Canadian northwest and they are hurrying to get a year's work under cover in a grim struggle with the elements. Frank Taylor, an outstanding figure, has lost his crop and is working for Marsh to get money and hurry back to his own farm.

Marsh tells Taylor his sister, who has lost her wealth in England and is coming to make her home with them. Will Frank meet the lady at the station? Surface breeding immediately clashes with the essential life. Nora treats him like a hired man and insures his cordial dislike.

At the Marsh home this friction is intensified when Gerie, Ed's ex-waitress, notices the way Ed treats his sister. Nora gradually swallows her distaste for surrounding crudities and tries to be useful. She is shocked on hearing Taylor say that he needs and wants a wife who can work. Soon the inevitable clash between the two women arrives. Nora is faced with the choice of remaining an unwelcome guest or going forth into the endless prairies. She asks Frank to take her. And so the story runs on, dwelling with a grim struggle against the vicissitudes of the elements. What did they hold in store for the rough farmer and his aristocratic wife?

A Good Doctor

"Let me kiss those tears away, sweetheart," he begged tenderly.

She fell into his arms and he was very busy for a few moments. But the tears flowed on.

"Will nothing stop them?" he asked breathlessly.

"No," she murmured. "It's lay fever, but go on with the treatment."

Another Shipment of HARNESS

Has Just Arrived. See us before you buy.

Shooting Season Opens

The shooting season in Alberta and Saskatchewan opened today, September 15. The bag limit in Alberta, for ducks is 30 per day, 200 for the season; geese, 15 per day. Swans and Cranes are in closed season. Rabbits and Coats, 25 per day; Wilson Snipe, 25 per day. Bannan Partridge, 15 per day. 75 the season. The season closes December 14. Sunday shooting is prohibited.

Dominion Crop Estimate

According to the Dominion Bureau of Statistics, Alberta has established a new high record with an estimated crop of 108,862,000 bush, of wheat as against 113,180,000 bush in 1926 and 144,584,000 bush in 1923. Saskatchewan, 27,137,000, 1926, 218,613,000, Manitoba, 35,224,000, 1926, 15,667,000. The total wheat production of the prairie provinces is indicated at 432,223,000 bush, as compared with 383,147,000 bush in 1926 and 452,260,000 in 1923, the record crop year. In 1923 the crop amounted to 474,199,000 bushels.

Out production is estimated at 602,199,000 bushels, of which 332,494,000 bushels were produced in the prairie provinces.

Stocks And Feeder Show

The Fifth annual Alberta Stocker and Feeder Show will be held on October 17 followed by an auction sale on the 18th of all entries. Prize money to the extent of \$8,000 will be offered for carload and group classes of the best breeds of cattle of all ages up to three years; also for carload and group classes of calves, either steers, or heifers, or mixed. All entries except calves must be branded. Any commission firm at the Calgary yards, or the manager, will be glad to answer all enquiries for further information.

A fool there was and he saved his socks, even as you and I; but he took them out of the old strong box when a salesman called with some wild-out stocks, and the fool was stripped of his shirt and socks, even as you and I.

DENTIST

Dr. DOWLER

Successor to Dr. Dunbar, will be open for business in Empress October 1.

Wednesdays, Thursdays and

Fridays

Offices: Royal Bank Building (Opposite Hotel)

Meeting of Medicine Hat Presbytery

The Medicine Hat Presbytery of the United Church, will not be able to meet in Empress this Fall as had been planned; to the regret of many. Urgent business demanded the meeting in the Hat last Friday. The new chairman is Rev. E. T. Serag, 5th Ave. Church, and the Secretary, Rev. R. N. Matheson, Redcliff.
Rev. N. W. Whitmore was re-elected as Convener of the Maintenance and Extension Work for the Presbytery.

MAY HE REST IN PEACE

Breathes there a man with soul so dead,
Who never to himself hath said,
"My trade of life is getting bad,"
I'll try another ten-inch ad."

If such there be, go mark him well,
For him no bank account shall swell;

No angel wails the golden stair To welcome home a million-
aire.

The man who never asks for trade
By local line or ad displayed
Cares more for rest than world-
ly gain.

And patronage but gives him pain,
Tread lightly, friends, let no rude sound
Disturb his solitude profound;
Here let him live in calm re-
pose.

Unthought except by men he owes,
And when he dies go plant him deep,
That naught may break his dreamless sleep;

Wherever no man may dispel
The quiet that he loved so well;
And that the world may know its loss,
Place on his grave a wreath of moss;

TEA "is good tea"
 RED ROSE ORANGE PEKOE is extra good.

Canada To The Fore

Canada is certainly being kept well before the people of the British Empire, year by year, and to a greater or less extent, the attention of the people of the United States. The publicity the Dominion is receiving is of the best and most effective type, and can hardly fail to be productive of results highly beneficial to the Dominion.

The elaborate and wonderfully successful celebrations in connection with the Diamond Jubilee of Confederation focused the attention of the Empire, and large sections of the United States, upon the Dominion and led to a study of its past history and the really marvelous development of the country during the past sixty years. Canada today is better known and appreciated not only by the people of Canada, but by the world. The story of its development and its future possibilities has been told far and wide and in such a way as to command the earnest attention and consideration of people of power and influence.

Following the Jubilee celebrations, the visit of H.R.H. the Prince of Wales, Prince George and Princess Patricia has again kept Canada prominently before the people of Great Britain. The tour of these distinguished visitors has been followed with the keenest interest by the British people, and it is well within the bounds of probability that a very great stimulus will thus be given to British immigration to Canada.

The ceremonies attendant upon the dedication of the Memorial Chamber in the Peace Tower at Ottawa by the Prince of Wales in their simple but impressive dignity could not fail to impress the British people. So, too, the unveiling of the statue of Sir Wilfrid Laurier who no nobly carried on the work of the Fathers of Confederation and who was always a commanding and powerful figure in the eyes of Great Britain. Finally, the official inauguration of the Peace Bridge and the visit of the British royal family, the Premier of Great Britain, the Governor of Ontario, and the President of the United States, the Governor of New York, the Lieutenant-Governor of Ontario, and other high officials, provided a friendly meeting ground for the whole English-speaking family and provided an object lesson for all the nations of the world.

The present tour has witnessed the placing of a Canadian Minister at Washington and an American Minister at Ottawa, has revealed the existing trade relations with the world; property and decreased taxation at home; substantial reductions in the National debt; growth and development in all directions. Men of prominence in the life of Great Britain have visited Canada in increasing numbers, and at the present time, proprietors of nearly one hundred influential British newspapers are touring the Dominion from coast to coast, seeking for themselves the prevailing prosperity and rising up the most possibilities of the future. It is no little boast to say that the Twentieth Century is Canada's century. But for the interruption of the Great War and the ensuing depression, and reconstruction rendered necessary to make good war's destruction, Canada would now be much farther along the road to the goal set for it when the century opened. It may well be, however, that the very conditions created in the old world as a result of the war will have such far-reaching results in the movement of population that, in the long run, Canada will be a magnet of settlement and economic development more than make up for the lost war years.

Certain it is, the war made Canada known to the world as nothing else could have done. Through war Canada has realized its own strength, its own capacity for achievement, developed its productive and financial strength, proved its ability to solve difficult problems and handle arduous enterprises. Now, in its Jubilee year, the Dominion is feeling the impulse of a rejuvenated National spirit, and is enjoying the fruits of a era of marked expansion in all lines of national endeavor.

The effect is everywhere noticeable throughout the Dominion and the Canadian people are aware that the war has developed the Dominion's strength and potential wealth are being investigated by the Old World as never before, and the story told to the millions by their own leaders following personal visits to this country. Canada can realize greatness to the full extent that her citizens are prepared to strive for and by service and effort bring to fruition.

Motor Casualties Increase

Daily Toll Of Accidents Has Become Appalling

Notwithstanding all the warnings and regulations, fatalities caused by the safety of those who use the roads, the daily toll of accidents is appalling and the total casualty rate will be something enormous. The majority of these accidents are preventable, and the worst feature about many of them is that it is so often the victim who is to blame. The lost driver could be expected more readily if he were the only person whose life he endangers, but this is not the case. The innocent party who suffers most when the speed limit is abused.

Hotel For Children Only

Both camps have the first hotel for children only. This hotel was erected by the city's juvenile welfare organization in one of the quiet districts of Berlin. It accommodates children sent to recreation places, who have to make a stopover in Berlin. The hotel has rooms for 250 youngsters.

"Pedal Propelling" Boat Refused To Function

Craft Is Useless and Trip Across Atlantic Has Been Abandoned

Confessing that the idea of "pedal propelling" across the Atlantic is a failure, Edward Tierney and Dick Chapman, of Lancashire, are understood to have definitely abandoned the plan to make such a crossing and to merely sell their strange craft.

Tierney tested the boat, called the "Carrie" in the harbor and was dismayed to find she refused to function. After repeated attempts he said:

"The craft is useless. She has a bad list and leaks badly. The pedal propelling idea is a failure."

"Carrie" is a 12-foot boat built like a submarine. She has a beam of three feet and draws two feet of water. She was designed to obtain power mainly through the force of the wind against a small, vertical propeller. When the wind was light, in calm weather the navigators were to use muscle power to drive the propeller by means of foot or hand pedals. When the plans were made, Tierney and Chapman said they hoped to make the crossing in forty days.

Use This Liquid

To Peel Off Corns

An amazing new cure for corns and calluses on the feet. The corns peel off and the skin is smooth. Another application of this liquid and the corns are gone. Wonderful—yes it is—but that is not all. It is a liquid that can be used on the feet of the whole family. It is a liquid that can be used on the feet of the whole family. It is a liquid that can be used on the feet of the whole family.

Postpones South Pole Trip

Commander Byrd Declines Details

After careful consideration of the danger involved in a hasty preparation for his expedition to the South Pole, Commander Richard E. Byrd has announced that the undertaking would be postponed until 1925.

Byrd, while in the Arctic, had expressed the hope that he could make his start this fall. It was explained that Commander Byrd expected to encounter severe storms and conditions which would make a mishap of any kind almost sure.

RETAIN YOUR VIGOR

This Can Only Be Done by Keeping the Blood Rich and Red

If you would retain your vigor and energy, keep your blood and nerves in good condition. A rich, red blood is the vitality, strength, and power of the body. A poor, thin blood is the cause of a general run-down condition. When the blood is poor, the body is weak. The blood is the life of the body. It is the blood that carries the food and oxygen to the cells of the body. It is the blood that carries the waste products of the body to the lungs and kidneys. It is the blood that carries the heat of the body to the surface. It is the blood that carries the life of the body. It is the blood that carries the life of the body.

Quota Law Is Needed

Immigration From Central Europe To Canada Should Be Limited

Last May 25,000 immigrants were admitted to this country. Only 5,000 were from the British Isles. So nearly two-thirds of the new settlers were of non-British race.

What is going to happen to Canada if our immigration department is allowed to continue that policy? With the experience of the United States before us, we seem to be on our way to committing national suicide.

The greatest need of Canada is a quota law. It is a law that will limit the number of immigrants from each country. It is a law that will limit the number of immigrants from each country. It is a law that will limit the number of immigrants from each country.

No Change In Style

A young married woman who believed that scientific fitness appeared coincided with her own appearance upon a card called in to the doctor to see her. She was suffering from a chronic ailment. He prescribed some simple exercises. She followed them. She felt better. She was cured.

"Well, thank," replied the doctor, "but she is very old-fashioned."

For Cans and Bunches use Binar's Liniment.

If your back is not satisfactory, try Binar's Liniment. It is a liniment that will cure your back. It is a liniment that will cure your back. It is a liniment that will cure your back.

Nine times out of ten when the unexpected happens we bring it on ourselves.

Death Of J. Ogden Armour

Once Controlled a Billion Dollar a Year Business

J. Ogden Armour, who once controlled a billion dollar a year business but who liquidated his holdings to such an extent that he has virtually vanished from financial and commercial fields, died recently in London in his 84th year.

He was the former head of Armour and Company, packers, founded by his father, Philip D. Armour.

Mr. Armour's holdings had so dwindled in recent years that in 1925 the federal revenue office showed his income not taxable. He at one time declined \$150,000 for his interest in the packing company alone, and was known as the largest owner of bank stock in Chicago.

His interest in one of his classes drew for him universal affection, and he seemed to delight in his friendship with his employees.

Rate played its part in making and unmaking the Armour fortune. Deflation at the close of the century, aided by Philip D. Armour and at the close of the great war, gravely weakened the financial power of his son, J. Ogden.

The Chicago Herald and Examiner said that although Mr. Armour was a miser and his personal life was not a happy one, he was a brave soldier.

"He was a financial genius at the time of his death, second only to his father, who was a brave soldier," said the newspaper.

Newest Military Aeroplane

Britain Builds the Largest Flying Ship in the World

Great Britain's newest military aeroplane is a veritable battleship of the air. It is the largest flying ship in the world, one of the wings alone being longer than the hull of a battleship.

It is the largest flying ship in the world, one of the wings alone being longer than the hull of a battleship. It is the largest flying ship in the world, one of the wings alone being longer than the hull of a battleship.

Clifford the Iris II, the huge flying boat takes off from the water at a speed of 50 knots. In her hull are ample living quarters and sleeping accommodations for a crew of five.

The ship's operator's room is a separate, noise-proof compartment. The new design of the ship is equipped with fresh water, fuel, and cooking apparatus in her galley. She can remain in the air 14 hours.

Would Banish All Wars By Interesting The Public In The Cause Of Internationalism

"Internationalism through education" was the theme of an eloquent address to the second biennial conference of the World Federation of Education Associations, held at the University of Toronto, by Raphael Herman, of Hollywood, Cal. Mr. Herman has devoted years of his life and a large portion of his fortune to the cause of internationalism.

After expressing his diffidence as a layman before professionals, Mr. Herman congratulated the federation on having selected Canada as its meeting place. The 2,000 mile length of unpopulated frontier between Canada and the United States spoke volumes for the actual possibility of neighboring nations continuing to live at peace with each other.

"May I be permitted to state at the outset that I am neither militarist nor pacifist," opened the speaker. "I am an 'internationalist' that is, one who loves his own country with devotion, but is convinced that patriotism does not lie only in a willingness to die for one's country, but also to live for it. As such, I come to plead the cause of world peace through education, the only practical means of solving the problems which face humanity. I come to plead to you, educators of the coming generation, by whom all the problems will be brought about—in whose hands lie the peace and the destinies of the human race."

"The modern conception of internationalism is not based on the extinction of national individuality. It is founded on the principle of the creation and the growth of a new unity in the midst of differences, such as is achieved in a marriage, where one piece may complement with, but fits into and contributes to the beauty of the whole intricate pattern. Nationalism and internationalism are complementary. Each is necessary to the other for the complete life, and each should amount to a passion and as such be accepted as a normal manifestation of human nature."

"Political thinkers, philosophers and economists have recognized the principle that for the solution of many of its own problems one nation depends on others. The complex of all nations includes an intense desire for the development of the individuality and all that it implies in the direction of cultural and political fields. This is a fundamental, biological and psychological fact. If I have defined, they will fall short of their own ideals and in the attainment of the highest form of existence possible."

"It is urged that training for war is as important as it is according to nature, whereas training for peace is impossible because it is contrary to nature. We need not point to the United States and Canada. If the poetical spirit is possible here, it is equally possible elsewhere and with its appearance elsewhere the world's problems would, in a large measure, soon be solved."

"It was absolutely essential that the young should be taught history as such and without bias," Mr. Herman declared.

"Youth should be impressed with the idea that truth must not be made subservient to a desire to enforce a personal viewpoint."

"History should tell the great adventures of peace over war. Peace and not war, peace with its great beneficent life is the great and only achievement worth the while, which will lead to thoughts of freedom, peace and goodwill and things which help for the genuine progress and happiness of the world."

"History should not be taught to little children because things must be brought down to childhood in order to make it understandable to them."

Mr. Herman supported his position by quotations from President Stanley Dutton, Premier Irvine Welsh, Minister Strachan, and other statesmen.

"We have many children and excellent textbooks on military science," continued the speaker. "Patriotism is not taught to worship war and its horror, like Caesar, Napoleon and Hitler; and we are taught to admire deeds which we could condemn indignantly if done in the ordinary walk of life."

"But we do not have a single school for peace. Just think of it; not a single institution that has been called the pioneer of a great new empire in which we could discuss the

mutual comprehension and clarity subject that become distorted and confused in the turbid atmosphere of the street. We must therefore begin with the spiritual and intellectual aspects of peace and have schools of peace like those of war, which will lead directly toward the goal which is no less than the establishment of the Kingdom of God on earth."

Alberta's Honey Industry

Production This Year Will Be Worth \$100,000, Is Estimate

Quite a number of apiaries have been established in the irrigated districts around Lethbridge and are enjoying good returns from the alfalfa and sweet clover honey. One of the largest of these apiaries is at Coolidge, where there is an extensive plant capable of handling three to four tons of honey daily. Altogether there are 1,100 colonies at Coolidge and 400 at Lethbridge. One earload of honey has been shipped this season to Calgary and another to Edmonton. Warm weather and a wealth of sweet clover and alfalfa bloom in the irrigated districts are combining to give the bee men the best harvest in years, and if the weather remains fine for the remainder of this month it is thought more than 300 tons of honey will be produced in Southern Alberta. As honey is worth in the neighborhood of \$200 a ton, the total yield promises to be worth in the neighborhood of \$100,000.

At the Roid's headquarters the honey from the 45-truck tractor is pumped into two huge tanks in the packing department, and there placed in the containers for shipment.

Pirenos Summoned By Wireless
Wireless was used for the first time in England recently to summon help to a burning ship near port. With her hold ablaze, the steamer Pirenos, on route from Belfast, called for the Liverpool fire force and then made a dash for shore. The waiting fire brigades, after an hour's battle with the flames, saved the Pirenos's valuable cargo of cloth and lamp tins.

Extends System Of Farm Training
A step in the direction of extending the system of farm training for the Overseas Dominions is announced in the decision of the British Government to enlarge the farm training centres in Britain so that 2,000 men may be trained annually, instead of 1,400 as at present. This is regarded as preliminary to a much larger extension.

Contaminated Grain
A risk is run by giving livestock contaminated grain. Although smut-spore-infested grain or feed is not so dangerous to livestock as it is sometimes believed, there is no doubt that feed contaminated with smut is unwholesome. Although the matter is not altogether cleared up, farmers are advised, the government department of Agriculture believes, on smut diseases of cultivated plants, not to run risks by giving animals such feed.

In an extensive investigation with all the primary farm animals there are no instances of definite sickness brought about by the eating of smut-contaminated food, but the frequent occurrence of minor disturbances has been brought to the attention of the generally used. When smut is abundant in a crop which is cut for green feed it may cause irritation and congestion, and a number of fatalities among cattle from this cause have been reported.

The United States raises 375,000 tons of peanuts every year. No statistics are available as to other nuts produced.

Woman in London Store Walks Through Plate Glass Window
A woman shopper absent-mindedly walked through a plate glass window at Folkestone recently.

The woman had made a purchase at a drapery shop and was preparing to leave. At the time the lack of one of the large windows was open, ready for dressing.

The customer unconsciously walked up the step leading into the window and then across the empty window floor right into the plate glass measuring 14 by 12 feet.

The window was shattered, but the customer escaped unharmed.

When asked for an explanation the said she must have been thinking of something else.

Estater's Should See West
"It's a pity more Eastern Canadian travellers do not travel through the West. They have no idea of the marvellous scenic beauty, or of western progress," in the opinion of Lady Roddick, Montreal, who has been on a tour of the coast of the west and Alaska—her first trip west of the Great Lakes. Marvelling at the mountains, she was yet most enthusiastic over the railways, and the size of the towns she had met.

Will Raise Sheep
The Earl of Minto has recently been selling off his purchased cattle in order to devote his attention to sheep raising. There are already 1,500 sheep on his Alberta ranch and more will be added from time to time.

A lion performing in a circus in New York worth \$2,000. Trained lions, bears and leopards all are valued at about that amount.

He who has everything he wants usually also has a job lot of things that he doesn't want.

Friend: Why did you send that dish back when there was nothing wrong with it?
Skeetman: Well, mon, if ye gile the impression that ye're to satisfy me the service the waiter's no expect such a big tip.

New Coal Product

Cheaper Than Oil Says Agent of English Firm

H. A. Bradstreet, of London, who arrived in New York recently on the Iberian, represents the Shell Oil Corporation of England, which is the owner of a newly patented reducing process for coal that leaves a residue which, when pulverized, can be used, he said, in ships and locomotives.

"The whole secret of this unleaking of the products of coal is in a simple," said Mr. Bradstreet. "The coal is put into a big retort similar to a cement kiln, and while the retort rotates the hot, inert gases make the coal yield up the volatiles from which the products are obtained. The residue is left, and it, when pulverized, can be handled with safety."

"We gave a demonstration on July 12 for the British Institute of Naval Architects at Cambridge University, at which representatives of the United States Shipping Board were present. As a result of that demonstration I am in New York."

"Oil is too expensive as a fuel, as large shipping companies in England and America have heard the ship owners now turning to pulverized coal that will now as easily as oil, and will give the same steaming radius at one-eighth to one-sixth the cost."

Poultry Congress Great Success

Exceeded the Most Anticipated Expectations of Organizers

The Third World Poultry Congress which was held in Ottawa from July 10 to August 4 was a greater success in every way than its most sanguine promoters expected. Forty-two countries sent delegates and the live birds on exhibition totaled nearly 10,000. There were birds from the poultry farms of King George V, of Britain, the Prince of Wales, and from the farms of other reigning monarchs in Europe. The United States and Canada had very large and attractive exhibits which indicated the progress that poultry raising has made in North America. Several thousand delegates and visitors from the United States attended the Congress and took an active part in the sessions of the Congress. On August 3, H.R.H. the Prince of Wales, his brother, Prince George, His Excellency, Viscount Willingdon, Governor-General of Canada; Hon. Mr. Stanley Baldwin, Prime Minister of Britain, and Hon. W. L. Mackenzie King, Prime Minister of Canada, visited the Congress exhibits.

Smut Infected Feed
A risk is run by giving livestock contaminated grain. Although smut-spore-infested grain or feed is not so dangerous to livestock as it is sometimes believed, there is no doubt that feed contaminated with smut is unwholesome. Although the matter is not altogether cleared up, farmers are advised, the government department of Agriculture believes, on smut diseases of cultivated plants, not to run risks by giving animals such feed.

In an extensive investigation with all the primary farm animals there are no instances of definite sickness brought about by the eating of smut-contaminated food, but the frequent occurrence of minor disturbances has been brought to the attention of the generally used. When smut is abundant in a crop which is cut for green feed it may cause irritation and congestion, and a number of fatalities among cattle from this cause have been reported.

Progress In Agricultural Methods

Unprecedented Demand For Farming Machinery Is Noted This Year

The outstanding trait of Western Canadian agriculture is its ceaseless progression. Western Canadian farmers are not only improving their methods, but are constantly featuring new developments. The diversity of crops extends; methods of operation are steadily being improved. In particular, the advances in the adoption of mechanical devices and the general utilization of machines to facilitate farming operations and reduce manual effort has been striking. Today the profession of farming in Western Canada depends not so much on physical strength as a practical administrative sense and a working mechanical knowledge. Manual labor requirements are steadily being reduced to a minimum, and the Western Canadian farmer is becoming more and more the operator of a machine.

According to reports from intelligent observers in Western Canada, the spirit of this year revealed two very marked trends in the agricultural industry of this territory, one being the greater "powerizing" of the large dry land farms and the other a marked increase in the favor and probable utilization of the combined harrow-plow-tractor. Dealers in the territory report an unprecedented demand for the light farm tractor and a tremendous increase in orders for combines. Tractors have been steadily delivered at farms as they were received from the factory, while, according to one estimate, the number of combines which will be used in Saskatchewan and Alberta, this fall will be one thousand machines as compared with 175 in use last year—Lindsay Leader.

Japan's Seaweed Crop

Is Growing, Especially For Food and Carefully Cultivated

Japanese soldiers do not find much trouble to the Quartermaster's Department. In the field they are capable of great endurance on a diet of dried rice, dried fish, dried seaweed, and pickled plums. The seaweed is wrapped round the rice, as a "relief" to it. Given a tiny piece, a steppan, and the rations mentioned, the soldier is perfectly content with the weather and however long the marches.

Seaweed is grown specially for food purposes, being eaten with much care as any other crop. After the typhoon season, the women may mean bearing great loads of seaweed which have been stripped of their leaves, though all the small branches are left intact. These are then used to weave the weed on acres of brushy saplings being arranged in long, parallel rows where the tide ebbes over them twice daily. Gradually the green fronds of the weed collect on the branches, and flourish there until the farmers harvest it. It is then carefully picked over and dried for future use.

Increasing Attention Paid By Authorities To Protection Of The Health Of The Public

Do Hens Need Open Runs

In the Pen Or Allowed To Run in the Open, Advantages Are About Equal

For five years an experiment has been under way at the Agassiz Experimental Farm to find out whether or not laying hens do better confined in pens or allowed their freedom in the open. The report of the station for last year gives the results of this experiment and also deals with live stock, bird crops, gardening, and other experiments, is available at the Publications Branch of the Department of Agriculture, Ottawa. Banded Plymouth Rocks comprising ten pullets in each pen have been used year to year. The results for the five years show that the advantages are not great either way. The birds confined to their pens gave an egg yield of 189 per bird, while those on range laid an average of six eggs less.

The value of the eggs was practically the same, being \$1.22 per bird for the pen and \$1.20 for the range. There was but one per cent difference in the cost of feeding, which amounted to \$2.75 for the pen and \$2.76 for the range. The grain fed consisted of equal parts of wheat, oats, and ground corn with a mash consisting of 100 pounds each of wheat shorts, corn meal, and crushed oats, and 75 pounds of beet scrap and two per cent of charcoal.

One of the most essential duties of a government is the proper protection of the health of its people. This thought became so forcible in its demand for action that a Department of Health was formed at Ottawa in 1913, its primary factors being derived from other departmental branches concerned with health matters.

Since its inception the scope of the department has gradually increased, and now in Canada's Jubilee year, we find strong, concentrated effort working for the welfare of Canadians through the medium of the Health Department.

The Quarantine Service of a country stands for protection against the introduction and spread of contagious diseases, and the measures are in operation five large completely organized quarantine stations. Every port of entry through its custom officers and sub-officers.

A medical inspection of immigrants is carried on at all ports of arrival and departure, mentally and physically unfit are prohibited from entry. Previous to the inauguration of a world-wide plan for the care of sailors in distress on the community. To overcome this difficulty a tax is now imposed, according to tonnage, on all ships arriving at Maritime ports, and the Canadian Government assumes the care of all sick and injured sailors arriving at ports of entry.

The sanitation and control of the narcotic drug traffic has a wide significance, and Canada, through this department is well to the front in the world. In 1913, approximately 225 pounds of opium, 250 ounces of morphine and heroin and 327 ounces of cocaine were seized in Canada during the past year. No less than 268 aliens were deported from Canada after conviction for various offences under the act.

The problem of patent medicines has for many years been a difficult one in all countries where efforts were made to systematize and control these products. Within the last few years the number of these preparations on the market under license in Canada has been reduced from approximately 50,000 to 5,500 and all preparations for which exaggerated claims are made, or those of foolish or harmful composition have been excluded.

Spill-ways to be built are accomplished in the Child Welfare department. It is concentrating its effort on the problem of maternal mortality. Shortage of the language of this question will be brought before the physicians and the Canadian public. Publications dealing with this subject and with Child Welfare have been issued by the department.

The adulteration of food has been a prolific source of fraud for centuries. The food and drug laboratory of the department examines thousands of samples of food products every year in its endeavor to give the consumer exact weight or measure, and a bona fide product, as printed on the label.

Owing to the fact that the traffic on the Great Lakes and other inland waters of Canada has increased with the population, the waters of the lakes became correspondingly polluted and unsafe for human consumption. This is particularly true in the harbours and at the shore line. All vessels are now inspected and must carry pure water for the use of the passengers and crew.

Depredations Of Rabbits

Residents in the Harbour district near Swift Current are planning a general slaughter of rabbits this fall. The grain country suffers their depredations on crop in stock. Last year the rabbits swarmed in from the bush when food ran low and ate up practically all the grain in stock on one farm. It is planned to sell the rabbit pelts and feed the carcasses to pigs.

Report Is Denied

Officials of the Canadian Government Merchant Marine denied the report that the C.G.M. would establish a regular steamship service between Vancouver and the West Coast of Mexico and South America. It was stated that there are already 1,500 ships on his Alberta ranch and more will be added from time to time.

Prince and Baldwin at Ease

This study of the Royal Highness the Prince of Wales and Premier Baldwin of Great Britain, was taken on the deck of the Canadian Pacific liner Empress of Australia as she steamed towards the King's Wharf at Quebec where a thousand welcome awaited the distinguished visitors.

The Prince and the Premier had found a sunny spot at one end of the deck and were enjoying their first good glimpse of the Ancient Capital. Contrasting to the peacefulness of this scene the great guns from the Citadel boomed their welcome while thousands of people cheered incessantly from the gaily decked boats and shore line.

Thursday, Sept. 15, 1927

See "The Canadian."

John Sandbrook, returned on Thursday of last week from Winnipeg.

Mr. and Mrs. E. McGill, left this week for Medicine Hat, where they will spend a brief vacation with relatives.

Mr. and Mrs. F. Sibley, and children, returned last week from their holiday vacations. Mr. Sibley arrived home a day or so previous to his wife and family.

Next week's photoplay at the Empress Theatre will be "Silence," a very dramatic photoplay. This picture has already been shown east of Empress and we are assured that it is a really good photoplay.

Mr. and Mrs. McGinnis, and family arrived here the first of the week and have taken up residence at the Creamery. Mr. McGinnis will have management of the local Creamery; he had charge of the Creamery at Wadena, previous to being transferred here.

We are agents for all magazines and newspapers. Give your orders to the "Empress Express."

Dave Lush reports that after a drive of over 800 miles by car, he is of the opinion that Empress is blessed by "one of the finest grain crops. North of the Swift Current there are hundreds of acres of frozen grain which will not see the binder. While he was at Fox Valley a big steam outfit arrived, shipped in from the Aneroid district.

Rev. and Mrs. N. W. Whitmore and daughter, Margaret, returned from their holiday camping trip, on Saturday.

The services of the United Church are open to all. Do yourself good by coming to Church, Sunday morning.

Charlie Henderson, who used to farm north of town, and is farming in Ontario, is visiting in the district.

Miss Peggy Arthur has been on the sick list during the past week and has been confined to the house. She was operated on today for appendicitis.

Jack Flood's crop, on the McNiven place was one of the first to be threshed. The sample was a splendid one. The yield was estimated to be thirty-six bushels to the acre.

At this time of the year, as father continues his vacation, and the children resume their education, many a mother will feel as though she has just begun a vacation.

Glen Russell, who commenced to thresh his wheat crop this week, reports the yield to be averaging 37 to 38 bushels to the acre. Mr. Russell is farming on a large scale south-west of Empress and has some five

hundred acres of a like quality of grain to thresh.

W. Ray and Bill Sandbrook, made a trip to Medicine Hat by car, on Sunday.

Winter Care of the Dairy Herd (Experimental Farms Note)

Dairy cattle have been kept at the Dom. Experimental Station at Rothbar since 1914, and although methods of feeding and management are in some respects different from those in most herds, the health and vigor and production of the animals comprising the herd are such as to justify what has been done. Cattle do not seem to know whether the stable is painted or unpainted, whether it is made of dressed lumber or logs, their production and condition of health does not seem to vary with the temperature. They are, however, affected by food, regularity of feeding, draughts, exercise and sunshine. The cows in milk and the calves dropped after July 1, are kept in stables free from draughts and so ventilated as to be supplied with dry fresh air but not warm, the temperature frequently dropping to below zero. It is convenient for

the herdsmen to have water in the mangers but the temptation then is to deprive the cows of sufficient exercise and sunshine. If turned out twice daily for water, irrespective of weather, the cattle are more healthy. Calves dropped before July 1, bulls and unfreshened heifers do not require stables. They thrive in corrals having pole and straw shelters over the north end. When provided with plenty of fresh bedding they do not seem to mind the low temperatures, although wind does seem to affect them adversely. It is better if the shelter can be closed in time of storm. Cattle can be carried through the winter under such conditions increasing in weight if they have sufficient feed of

the right kind. They thrive on plenty of hay or cut straw and ensilage with a little meal. They thrive better if feeding, watering and milking are carried out with regularity.—W. A. Munro, Dom. Exp. Station.

A slightly inebriated gentleman brushed into a cafe late one night and sat down at one of the tables. Holding the menu card upside down he

gravely inspected it for several moments. Suddenly, in an excited manner, he yelled, "Waiter, waiter! O'mere, quick, send for the manager; ther's been a terrible mistake made, a terrible mistake!"

"What is it, sir?" gravely demanded the waiter.

"Jus' look at this," shouted the drunk, wildly waving the menu, "thos darn fool printers have printed thish thing upside down!"

A Superb Dive Against Superb Scenery

One of the most remarkable photographs ever taken in the Canadian Rockies, a work of art that blends in equal proportions beauty, grace, peace, in one unique effect against a background of noble mountain scenery, is shown here where Miss Lydia Fulcher, fancy diver, is portrayed high in air poised like a bird as though flying over Eagle Lake Mountain in the infinitesimal fraction of a second before she cuts to cleave the waters of the pool.

The swimming pool where she is staging her great act is the newly constructed one of Lake Louise, about 90 feet long and 8 feet deep. There are springboards at different heights to suit the expert or amateur. Miss Lydia Fulcher, fancy diver, is attempting the cooler swimming in Lake Louise itself. Miss Fulcher champion of the Calgary Swimming Club is a true maid of the Canadian West. She

learned to swim in the Canadian Government's great pool, "The Cave and Bait," at Banff when she was a mere child. She became a champion last year at the Banff Winter Carnival when swimmers were diving into the Cave and Bait filled with hot sulphur water from Sulphur Mountain, when the temperature outside was hovering around the zero mark, while the water of the pool was well within summer temperatures.

FRUITS in SEASON

EMPRESS THEATRE

Thomas Meighan

in "The CANADIAN"

A STORY of the Canadian wheat fields, of helpless dependence on the vagaries of the weather, of the strength and optimism of men and women who are building a new empire under difficulties, and of the overwhelming effect it has on the sensibilities of an aristocratic Englishwoman suddenly thrust on to the great prairie

Friday and Saturday, September 16th and 17th

Comedy:

"One Glorious Fourth"

ADMISSION: 50c and 25c
